Monitoring

**WELLBABY
VACCINE
CLINIC**

HOW DO VACCINES WORK?

Boost immunity without the pain of suffering natural infection.

WHY VACCINATE MY CHILD?

1. Protect them from common ailments
2. Reduce child mortality
3. Boost healthy growth in child

ARE CHILDREN TOO YOUNG TO GET VACCINES?

No. If children were too young to get infected by bacteria and virus then they would be too young to be vaccinated.

WHY WELLBABY CLINIC?

Our mission is to provide quality healthcare to children.

The clinic is able to meet this objective by offering rewarding careers to employees, fostering sustainable and mutually beneficial partnerships, and integration of education, research, advocacy and clinical care for improved pediatric care

OUR VALUES:
Professionalism,
Respect, Integrity,
Collaboration,
Excellence
